I. DESCRIPTION

The M.S. Degree Program in the Department of Cell Systems & Anatomy (hereinafter referred to as the Program) offers training in the areas of anatomical sciences and biotechnology. The curriculum prepares students seeking a Master of Science degree for a fulfilling biomedical career, in academic, industrial or clinical settings. The overall mission of the Program is to prepare the next generation of life-long learners and critical thinkers, prepared to design and execute innovative basic and translational research, and to address the most important and challenging knowledge gaps in basic biology, human health, and disease. There are two parallel tracks in the Program: **Anatomical Sciences** and **Biotechnology** with some overlapping requirements but distinct curricula. The program of graduate study (i.e. the track elected) leading to the Master's Degree will depend upon the student and the career for which the student is preparing. A Committee on Graduate Studies (COGS) oversees all aspects of Program (see Section III below).

II. GRADUATE FACULTY

All tenured and tenure-track faculty with primary appointments in CSA are eligible to participate and mentor students as Supervising Professors in the Program. Non-tenure track teaching faculty with primary appointments in CSA can mentor M.S. students in the Anatomical Sciences track. Research track faculty appointed in CSA can participate as graduate faculty and supervise students in the Biotechnology track if the following conditions are met: (i) prior permission of their Principal Investigator and approval of COGS (if the faculty member is an independent investigator he or she only needs approval from COGS), and (ii) have a funded and active extramural or intramural grant that can sustain the costs associated with mentoring a student. Collectively, the mentoring faculty shall be referred to as Graduate faculty. A list of current approved Program Graduate Faculty is appended in **Attachment A**. COGS will review the Graduate Faculty rosters annually at the end of May. Continuing status as a graduate faculty member will be considered every three years. Approval for continued participation will be dependent on, but not limited to, demonstrated involvement in teaching courses taken by students in the Program, service as Supervising professor or thesis committee membership, service as member of COGS, etc. It is the responsibility of the Graduate Faculty to submit documentation of participation when requested by COGS. Failure to do so may result in termination of Graduate Faculty status.

III. COGS

COGS is comprised of a group of faculty appointed by the Program Director (COGS Chair) or selected by the COGS Chair to administer various aspects of the Graduate Program, including admissions and monitoring of student academic progress. COGS consists of the Chair, the Anatomical Sciences Track Student Advisor and Thesis Chair, the Biotechnology Track Student Advisor and Thesis Chair, Admissions Committee Co-Chairs, Student Seminar Chair, Awards Committee Chair and the Deputy Chair for Education and Training for the Department. The Department Chair, who is also the Program Director, serves in an ex-officio capacity and has the same rights and privileges, as do all other members, including, the right to vote. All members are counted in determining presence or absence of a quorum at meetings. Where necessary, decisions will be made by a simple majority vote of all members of COGS. Please see **Attachment B** to contact any of the above COGS members.

IV. GENERAL REQUIREMENTS FOR GRADUATE STUDENTS

a. Requirements for Admission

Students beginning graduate study ordinarily matriculate during the fall semester, which starts first week of July with classes beginning in August. The following are the basic admission criteria

for the Program. On a case-by-case basis and at the discretion of the M.S. Admissions Committee and with approval of COGS and the Graduate Faculty Council (GFC), one or more admission requirement(s) may be waived.

- Completed Application forms indicating the track (Anatomical Sciences / Biotechnology) to which the student seeks admission.
- GRE /MCAT/DAT scores taken within 5 years of application: A minimum combined verbal and quantitative GRE score ≥ 308 (160 verbal, 148 quantitative), MCAT score of 500 or a DAT score of 19 is recommended; however, lower scores may be considered based on overall potential of the applicant.
- TOEFL/IELTS taken within 2 years of matriculation into the program: For TOEFL, a minimum score of 550 on the paper test or 68 on the iBT is required and for IELTS, a minimum score of 6.5 is required of applicants from countries where English is not the native language.
- Certified transcripts of all college and/or postgraduate work: A baccalaureate degree in a natural science and/or biomedical engineering from an accredited institution in the United States or proof of an equivalent degree from a foreign institution is required. The transcript must demonstrate undergraduate credit for the following: i) Biology: a minimum of two years of general biology with labs for science majors; ii) Chemistry: a minimum of two semesters of general chemistry (analytical chemistry or biochemistry recommended); iii) Physics: minimum of two semesters of general physics; and, iv) Mathematics: a minimum of one semester of calculus. A cumulative grade point average (GPA) no lower than "B" (3.0 on a scale of 4.0) on all undergraduate-level studies undertaken previously is required.
- Essays: An essay describing prior research and/or teaching experiences that evoked an interest in research, long-term career goals, and rationale for applying to the Cell Systems & Anatomy graduate program.
- Letters of recommendation (3) from faculty and/or individuals with similar professional credentials who served as instructor, advisor or supervisor to the applicant are required.

Application deadline dates: Preferred deadline date is February 15 but no later than April 15 to be considered for admission the following fall semester. All supporting material such as GRE scores and letters of recommendation must be received before May 1. Spring semester admission (January start date) will not be considered except in very unusual circumstances.

b. Course Requirements

All students require a minimum of 30 semester credit hours (SCH) to graduate with a M.S. degree. See attached Academic Plans of Study - **Attachment C** (Anatomical Sciences track) and **Attachment D** (Biotechnology track) for details of coursework.

c. Grade Requirements

A student must maintain an overall cumulative grade point average (GPA) of ≥ 3.0 ("B" average) each semester to continue in good academic standing. If a student receives a grade that is worse than a "C" in one course or final grades of "C" in more than one course in the curriculum, he/she shall be dismissed from the Program unless an appeal from the student is approved by COGS. If the cumulative GPA drops below 3.0, the student shall be placed on academic probation. While on probation, a student must maintain a "B" average in all courses in which he/she is enrolled. If the GPA drops below 3.0 in any semester during the probationary period or remains below 3.0 for one calendar year, the student shall be dismissed from the Program unless an appeal from the student is approved by COGS. For the required courses the student must make at least a "B" and/or receive a satisfactory in courses graded Satisfactory, "S"/Unsatisfactory, "U".

If remediation of a course is agreed upon by a course director and COGS, the director(s) of a required course will determine the mechanism for remediation. However, course directors are

not required to remediate students. Situations that involve potential remediation will be resolved on a case by case basis. A student who is not required to remediate a required course may not engage in the remediation process with the intent of improving his/her original grade. This policy will be reviewed annually.

d. Exemptions from Required Course Work

All requests for exemptions for any of the required course work must be submitted in writing to the Chair of COGS and be approved by a vote of COGS.

e. Student Evaluations

The Student Advisor will conduct semi-annual evaluations of each student for the purpose of following his/her progress throughout the tenure of the graduate program. These evaluations are to take place at the end of the fall and the spring semesters of each academic year.

A grade of satisfactory ("S") or unsatisfactory ("U") for Research (CSAT 6097) or Thesis (CSAT 6098) shall be given by the Biotechnology track student advisor. Likewise, a grade of "S" or "U" will be assigned for Anatomical Sciences Thesis (CSAT 6060) by the Anatomical Sciences track student advisor. In all cases, the grade will be based on reports from either the laboratories in which a student has rotated, laboratories in which a student is working on thesis research or on student participation in required course work, seminars, journal clubs and other departmental activities. After appointment of the supervising committee, the grade for the Thesis will be based on updates presented to the committee members at semi-annual committee meetings. The form for committee member's evaluation of student's progress is appended as **Attachment E1 and E2**. If a committee meeting has not been held within 6 months, a grade of "U" will be assigned for progress that semester. However, if the student has already scheduled a committee meeting, the Student Advisor has the option of giving a grade of "I" (incomplete). Failure of a student to show satisfactory progress toward his/her degree goal based on these evaluations is grounds for dismissal from the Program unless COGS approves a student appeal. The Graduate School's policy that any student who receives two consecutive "U" grades will be subject to dismissal also holds.

V. SPECIFIC DEGREE REQUIREMENTS

a. Sequence Towards the Master's Degree

During the first semester of study, the Biotechnology Student Advisor / the Anatomical Sciences Student Advisor will serve as academic advisor for students in their tracks in the Program. During this time, each student shall enroll for the required courses indicated in the Plan of Study. Changes in coursework are not permitted unless appealed by the student and approved by COGS. Upon an agreement between the student and a graduate faculty, a student will choose a Supervising Professor/Mentor. Mentors must be selected by December 15 of the first year Fall semester and a signed thesis supervisor selection form (**Attachment F**) provided to the Academic Coordinator, that must then be approved by both the COGS Chair and Program Director. The thesis proposal should be prepared, where possible, early in the second semester of the first year, as per guidelines provided in **section V.c.**. Members of the Supervising Committee (see **section V.b**) should also be selected no later than the first semester of the second year so that they may assist in formulation and review of a proposal for the thesis. It is expected that the thesis committee members will be selected before August 1 of Year 2 and the first thesis committee meeting will be held before October 1 of Year 2.

After the Supervising Professor and members of the Supervising Committee have approved the final draft of the proposal (indicated by their signatures on **Attachment J**, Approval Form for Thesis Proposal), the student will formally present the proposal to the members of COGS in a short (10-15 minutes) presentation to be given no later than the end of the first semester of the second year. The written thesis proposal constitutes the written qualifying exam and the

presentation of the thesis proposal to COGS constitutes the oral qualifying exam. Copies of the proposal must be forwarded to the Academic Coordinator for distribution to all members of COGS at least one week before the presentation. It is the responsibility of the student and primary mentor to have the proposal delivered on time. Failure to do so will result in rescheduling the presentation to COGS. After the presentation, members of COGS will vote to accept the proposal as is or stipulate conditions for acceptance, or vote it unacceptable. Members of COGS will vote to accept the Supervising Committee as is or recommend additional members and/or changes to the composition. Once COGS approves the thesis proposal and the Supervising Committee, the student will be apply for admission to M.S. candidacy on IMPACT(see **section V.d**)

After admission to candidacy, all students must register for at least one semester of thesis hours prior to graduation. A student in the Biotechnology track must enroll in CSAT 6098 (Thesis) and an Anatomical Sciences track student must enroll in CSAT 6060 (Anatomical Sciences Thesis) for the final semester. The Supervising Committee shall continue to guide the student in selection of any additional courses and in the student's research.

After the proposal has been approved and the student admitted to candidacy, the student, in consultation with the mentor, shall organize regular meetings with the supervising committee at least twice a year (or more often if necessary) to inform about his/her progress on the thesis project. No later than one week prior to each meeting, the student shall submit to the committee a report of progress on the research, including statements of objectives of the research, methods, major results obtained, conclusions drawn, and proposed direction of future (remaining) work. The Supervising Committee shall evaluate the progress made by the student since the last meeting as well as overall progress to date and agree on the direction of future work to be undertaken. Each member shall complete an evaluation form for M.S. students (**Attachment E1** for the first committee meeting and **Attachment E2** for the second committee meeting and beyond). It is the student's responsibility to schedule the meeting and to give the completed and signed forms to the Academic Coordinator in a timely manner. If any member of the committee cannot attend a meeting, the student must apprise him/her of the student's progress at the earliest possible opportunity.

The committee shall also decide when the progress is sufficient to permit the student to commence with writing of the thesis. When the Supervising Committee is satisfied that research being conducted towards the thesis is near completion, it shall permit the scheduling of a defense in which the scholarly activity is presented first in a seminar, open to the public, which is then followed by a defense in a closed oral examination in front of the Supervising Committee (and any member of COGS that chooses to participate). Members of the committee will signify their permission by completion of GSBS Form 40 (**Attachment H**). The student and mentor are responsible for scheduling a mutually agreeable time for the committee. The Academic Coordinator manages scheduling of rooms for seminars and oral examinations through the Graduate School Office (see **Attachment I**) and sends out announcements to all Graduate Faculty and students about upcoming public defenses. It is the responsibility of the student and mentor to submit Form 40, thesis abstract and student vita to the Academic Coordinator at least two weeks prior to the defense (see **section VI.b**).

b. The Supervising Committee

The student and his/her Supervising Professor will provide COGS the names of the proposed members of the student's Supervising Committee (GSBS Form 42; **Attachment G**). The Supervising Committee must consist of:

- i.) the MS student advisor (Biotechnology Student Advisor/Anatomical Sciences Student Advisor) who will chair the committee. The role of the Chair is to maintain consistency of standards for student performance.
- ii.) Supervising Professor and at least two other faculty members from the Graduate Faculty.

- iii) One faculty member from another graduate program within the University of Texas Health Science Center, San Antonio but with a primary appointment in a different department (outside of CSA) at the institution.

Any exceptions to this prescribed committee structure must be justified in a memo to the COGS Chair from the student and his/her supervising professor. These requests will be reviewed by COGS and must be approved by a unanimous vote. The first duty of the Supervising Committee will be to assist the student in the planning of his/her project and in the preparation of a thesis proposal to be presented to COGS. It is the responsibility of the Supervising professor and the student to discuss the composition of the committee members with the Supervising Committee Chair.

c. Presentation of Thesis Proposal

The proposal for students in the Biotechnology track shall consist of:

- A. Hypothesis
- B. Specific Aim(s)
- C. Significance (background and rationale)
- D. Experimental Design, Data Analysis and Expected Results
- E. Literature Cited
- F. Use Arial, Helvetica, Palatino Linotype, or Georgia typeface, black font color, and a font size of 11 points or larger. (A Symbol font may be used to insert Greek letters or special characters; the font size requirement still applies.)
- G. Type density, including characters and spaces, must be no more than 15 characters per inch.
- H. Type may be no more than six lines per inch
- I. Paper Size: Use standard paper size (8 ½" x 11).
- J. Page Margins: Use at least one-half inch margins (top, bottom, left, and right) for all pages. No information should appear in the margins, including the student's name and page numbers.
- K. Page Formatting: Use only a standard, single-column format for the text. No two-column format since it can cause difficulties when reviewing the document electronically.
- L. Do not include any information in a header or footer of the attachments. A header will be system-generated that references the name of the student. Page numbers for the footer will be system-generated in the complete application, with all pages sequentially numbered.
- M. Figures, Graphs, Diagrams, Charts, Tables, Figure Legends, and Footnotes: You may use a smaller type size but it must be in a black font color, readily legible, and follow the font typeface requirement. Color can be used in figures; however, all text must be in a black font color, clear and legible.
- N. Number of Pages: Title Page, Abstract/Project Summary Page: This section must be no longer than 30 lines of text, and follow the required font and margin specifications, Specific Aims: 1 page, and Research Strategy: 6 pages followed by Bibliography.

The proposal for students in the Anatomical Science track may use the same format that Biotechnology students utilize or use the format below:

- A. Background
- B. Recent progress
- C. Significance/unanswered and important questions to be addressed
- D. Literature Cited

- E. Use Arial, Helvetica, Palatino Linotype, or Georgia typeface, black font color, and a font size of 11 points or larger. (A Symbol font may be used to insert Greek letters or special characters; the font size requirement still applies.)
- F. Type density, including characters and spaces, must be no more than 15 characters per inch.
- G. Type may be no more than six lines per inch
- H. Paper Size: Use standard paper size (8 ½" x 11).
- I. Page Margins: Use at least one-half inch margins (top, bottom, left, and right) for all pages. No information should appear in the margins, including the student's name and page numbers.
- J. Page Formatting: Use only a standard, single-column format for the text. No two-column format since it can cause difficulties when reviewing the document electronically.
- K. Do not include any information in a header or footer of the attachments. A header will be system-generated that references the name of the student. Page numbers for the footer will be system-generated in the complete application, with all pages sequentially numbered.
- L. Figures, Graphs, Diagrams, Charts, Tables, Figure Legends, and Footnotes: You may use a smaller type size but it must be in a black font color, readily legible, and follow the font typeface requirement. Color can be used in figures; however, all text must be in a black font color, clear and legible.
- M. Number of Pages: Title Page, Abstract/Project Summary Page: This section must be no longer than 30 lines of text, and follow the required font and margin specifications, Specific Aims: 1 page, and Research Strategy: 6 pages followed by Bibliography .

After the written version is completed, the student's committee must first approve the proposal. Then the student shall present the thesis proposal to COGS no later than the Fall semester of the second year in the Program. One week before the presentation to COGS, the student shall provide a written copy of the proposal and the signed approval sheet (**Attachment J**) to the COGS Chair. The student will defend the proposal before COGS. The Supervising Professor should be in attendance. At the end of the discussion, the student and the Supervising Professor shall be asked to leave the room and COGS shall vote for approval or disapproval of the thesis proposal. The composition of the Supervising Committee will then be discussed, and approved/disapproved by vote of the COGS. The student shall be informed of the votes immediately after and any changes required by COGS shall be transmitted. After approval, the thesis proposal shall be uploaded onto IMPACT for approval by the GFC.

In cases where the thesis proposal is not approved, members of COGS will meet with the student and his/her supervising professor immediately after their deliberation to present the reasons for the decision. Based on this input, the student shall present a revised or new proposal (as required) to the COGS within one month or in exceptional cases, within a time period as specified by COGS. Failure to successfully defend the second time may result in dismissal.

d. Admission to Candidacy

After the student has successfully presented a thesis proposal to COGS, and removed all "I" (Incomplete) grades from his/her record, the student will apply for admission to M.S. candidacy on IMPACT. For the Biotechnology track, the student will thereafter register for Thesis (CSAT 6098) instead of Research (CSAT 6097) hours. All students shall remain in residence in the Program and participate in all activities normally required of full time graduate students until the thesis is completed and the Final Defense (public seminar and closed oral examination) has been conducted.

VI. AWARDING OF THE M.S. DEGREE

a. Time to Completion of Degree Requirements

M.S. students are expected to complete all degree requirements, including the defense, in approximately two years of full-time studies from date of matriculation. During the design of the thesis proposal, it is important for the student and Supervising Professor to plan for a two-year time frame from entry into the Program until successful defense. Supervising Professors mentoring students requiring more than two years to complete the thesis will be expected to seek approval from COGS for a time extension at least two months before the end of the student's fourth semester in the Program.

b. Final Thesis Defense

To schedule the final defense, the student must submit Form 40 and 3 copies of abstract and vita to the Academic coordinator at least 3 weeks before defense; these documents will then be submitted to the Graduate Dean's office. A final draft PDF version of the thesis must be uploaded into ProQuest for formatting review by the Graduate Dean's office prior to defense. The publisher, Proquest/UMI, provides publishing guides regarding options for traditional publishing versus open access publishing and registering for copyright on their website. There is no fee for traditional publishing of theses and dissertations. You are required to submit your thesis to ProQuest/UMI for electronic publishing/storage. See **Attachment I** and Visit: http://gsbs.uthscsa.edu/current_students/graduation-information for details. The academic coordinator will then reserve rooms for the defense with room scheduling. See for more details.

The instructions for preparation and submission of the thesis should be obtained from the Graduate School of Biomedical Sciences Dean's Office. Failure to have your thesis in the required format will delay your degree conferral date. The Supervising Committee shall conduct the Final Defense. The examination will be preceded by an open seminar at which the candidate's research findings are presented to the public. This presentation should not exceed 50 minutes. Immediately following the presentation, the members of the audience, excluding the Supervising Committee members, shall be given the opportunity to ask questions. After a reasonable length of time or when all the questions have been exhausted, the audience will be excused. The examination shall then continue with the Supervising Committee and the candidate only. Following completion of the examination, the Supervising Committee shall vote on the candidate's performance. More than one signature on the non-recommended column on Form 41 (**Attachment L**) shall constitute failure. In the event of a failing performance, the committee shall make recommendations to COGS regarding the appropriateness of another oral examination after major revision of the thesis (only one is allowed) or Failure. COGS shall vote on acceptance or rejection of these recommendations while reserving the right to impose additional or new recommendations.

After the defense, please submit the following graduation forms to the Academic Program Coordinator: Form 41 with original signatures, [Copyright Disclaimer](#), [Forwarding Address form](#) and [Library Copyright Permission](#). Student must confirm that the thesis meets formatting requirements for ProQuest as per the Graduate School's guidelines.

c. Thesis

The typing of drafts and the final copy, collating and proof reading of a thesis are the responsibility of the student. The departmental administrative staff shall not perform any of the above as part of their regular duties. A final copy of the thesis, ready for binding must be submitted to the Chair of COGS for the Program. A hard copy of the thesis will be kept in the Department. The Supervising Professor is entitled to request a bound copy of the accepted thesis. For

formatting requirements, please refer to: http://gsbs.uthscsa.edu/current_students/graduation-information.

d. Awarding of the Degree

Once the COGS Chair has verified that all requirements for the M.S. degree have been satisfied, the Academic Coordinator will forward the approved from 41 to the Graduate Dean's Office. The Dean's office will verify and approve the formatting of the thesis. The COGS Chair then presents the recommendation of COGS for the award of the degree to the GFC. The student will be notified and asked to provide the completed binding form (**Attachment M**). The binding form is required to be sent to the UT Health San Antonio library along with the number of copies the student wants bound.

VII. EXCEPTIONS TO THE GUIDELINES

Any requested exception to the Guidelines shall be voted upon and approved by COGS.

VIII. LINK TO GSBS FORMS

http://gsbs.uthscsa.edu/current_students/forms

IX. TERMINATING FROM DEPARTMENT and UTHSCSA

Once the student departs from the Department and UTHSCSA, a separation form (**Attachment N**) will need to be completed for the department. In addition to the department's form, students must go in person to the registrar's office and pick up a clearance form.

Admissions Committees:

Anatomical Sciences Track: Dr. Omid Rahimi (Chair), Dr. Linda Johnson, Dr. Annette Occhialini, Dr. Alan Sakaguchi, Dr. Ramaswamy Sharma

Biotechnology Track: Dr. Manjeet Rao (Chair), Dr. Lily Dong, Dr. Pei Wang, Dr. Lizhen Chen, Dr. Ramaswamy Sharma

Awards Committee: Dr. Linda Johnson (Chair), Dr. Ramaswamy Sharma and Dr. Omid Rahimi.

Note: Dr. Kristine Vogel will continue as Anatomical Sciences Thesis Chair until 2016 matriculated Master's students successfully defend their thesis.

Attachment B

GUIDELINES FOR PROGRAM ADMINISTRATION BY THE FACULTY OF CELL SYSTEMS & ANATOMY

Several faculty members will oversee the administration of the Cell Systems & Anatomy (CSA) Graduate Program as members of COGS. The members of COGS and the term of each position are:

Chair of COGS -3 yrs. Appointment by the Chair of Department and Program Director. A full time faculty member in CSA, the COGS Chair will be the Program's representative on the Graduate Faculty Council (GFC), serving as a liaison between the Department and the GFC for the purpose of completing all business matters related to the CSA Graduate (M.S.) program. Will oversee the efficient execution of all activities of COGS so that the Graduate Program is carried out in an organized fashion. Will call COGS meetings as necessary. The outgoing Chair will assist the newly appointed Chair with August activities to facilitate the transition.

Student Advisor and Thesis Chair for Biotechnology Track -3 yrs. Appointment by the Program Director (after consultation with the COGS Chair). A full time faculty member in CSA. Will advise students, carry out student evaluations, supervise student rotations, monitor course requirements and ensure that students register for the appropriate courses listed in the Plan of Study, and assure that deadlines and committee appointments are met. The outgoing Student Advisor will assist the newly appointed Student Advisor with Orientation and other August activities to facilitate the transition.

Admissions Committee Co-Chairs -3 yrs. Appointment by Program Director. Full time faculty members of CSA. Will appoint and work with a committee chosen to reflect the various research areas of the faculty of CSA. Provisions will be made for staggering terms of Committee members. Will supervise the selection of qualified student candidates for the CSA Graduate Program.

Student Advisor and Thesis Chair for Anatomical Sciences Track -2 yrs. Appointment by Program Director or Designee. A full time faculty member in CSA. Will advise students, carry out student evaluations, monitor course requirements and ensure that students register for the appropriate courses listed in the Plan of Study, and assure that deadlines and committee appointments are met. The outgoing Student Advisor will assist the newly appointed Student Advisor with Orientation and other August activities to facilitate the transition.

Student Seminar Chair -2 yrs. Appointment by COGS. Will supervise student research seminars and obtain faculty evaluations of the student presentations.

Awards Committee Chair – 2 yrs. Appointment by COGS Chair. Will help identify a CSA MS graduate as nominee for the Armand J. Guarino Award and Rennels Award for Academic Excellence.

The Deputy Chair for Education and Training, Appointment by the Chair of Department. Has the authority to appoint the COGS Chair in consultation with Program Director/Department Chair.

The Department Chair, who is also the Program Director, serves in an ex-officio capacity and has the same rights and privileges, as do all other members, including, the right to vote.

Appointments will be announced no later than 01 June and responsibilities assumed effective 01 July.

MS Degree Program in Cell Systems & Anatomy

Plan of Study – Anatomical Sciences Track

First Year

Fall Semester		Semester Credit Hours
CSAT 5030	Basic Histology	1
CSAT 5060	Advanced Histology	2
CSAT 6060	Special Studies in Anatomy/Cell Biology	1.5
INTD 5047	Neuroanatomy	2
TSCI 5070	Responsible Conduct Of Patient-Oriented Clinical Research	2
CSAT 5074	Introduction to Research	0.5
Total Semester Credit Hours		9

Spring Semester

CSAT 5022	Inter-Professional Human Gross Anatomy	5.5
CSAT 6100	Anatomy Practicum	1.5
CSAT 6060	Special Studies in Anatomy/Cell Biology	1.5

Department of Cell Systems & Anatomy Graduate Program
Evaluation by Committee Members
Meeting 1

Student Name:

Mentor Name:

Month/Year Matriculated:

Date of Meeting:

The student should complete the information above and distribute forms to faculty at his/her scheduled committee meeting.

Committee member: *Please comment on issues that particularly need improvement.*

1. Is the student attentive and hard-working?
2. Has a thesis project with a testable hypothesis been identified?
3. Does the project have a strong rationale / scientific premise?
4. Have potential committee members been identified?
5. Is the student acquainted with the literature appropriate for the project?
6. Does the student design experiments and include appropriate controls?
7. Is completion of the project feasible within the timeline? (The student is expected to complete the project by April of his/her second year)
8. Were the student's responses to questions clear and to the point?
9. Additional comments:

Committee Member Name:

Overall Evaluation of research progress (*Please circle*):

- U Unsatisfactory
S Satisfactory for this point in the program
E Excellent

After each committee member has completed the evaluation, the student should collect the evaluations, review them with his/her supervising professor and then forward them to the Academic Program Coordinator, room 229D for inclusion in the student's file.

Department of Cell Systems & Anatomy Graduate Program
Evaluation by Committee Members
Meeting 2 / 3 (circle as appropriate)

Student Name:

Mentor Name:

Month/Year Matriculated:

Date of Meeting:

Date of Thesis Approval by COGS:

Other Progress (Presented a paper/poster; contributed to /authored a paper?)

The student should complete the information above and distribute forms to faculty at his/her scheduled committee meeting.

Committee member: *Please comment on issues that particularly need improvement.*

Was the presentation thorough and understandable?

1. Does the student have the appropriate command and can critically evaluate literature related to the project?
2. Do individual experiments appear to be well planned with appropriate controls?
3. Does the student understand the limits of his/her experiments? Has the student thoroughly considered the meaning of his/her results?
4. Have experiments listed in COGS-approved thesis been completed?
5. If the answer to Question 4 is No, why? List experiments that remain to be completed. Were alternative experiments proposed and approved by the committee?
6. Are the student's responses to the questions clear and to the point? Is the student applying personal initiative to the project?
7. Is the student adequately focused on a specific plan for completing the thesis?
8. Is the student ready to defend?
9. Additional comments:

Committee Member Name:

Overall Evaluation of research progress (*Please circle*):

U Unsatisfactory
S Satisfactory for this point in the program
E Excellent

After each committee member has completed the evaluation, the student should collect the evaluations, review them with his/her supervising professor and then forward them to the Academic Program Coordinator, room 229D for inclusion in the student's file.

CELL SYSTEMS & ANATOMY GRADUATE PROGRAM

SELECTION OF THESIS SUPERVISING PROFESSOR FORM

Complete and submit this signed form to the Departmental Administrator. Following review and the CSB COGS Chair and Departmental Chair's signatures, copies will be sent to you, the Supervising Professor, the COGS Chair and the Department Chair.

STUDENT NAME: _____
 Last name First name Middle initial

Email Address: _____

***STUDENT SIGNATURE:** _____ **DATE:** _____

***The student's signature certifies that the student understands that Masters degree students are fully self-supporting and do not receive a stipend/salary from the department. In some instances the supervising professor may pay the student, but it is not required or guaranteed.**

My selection of a faculty member to serve as my thesis Supervising Professor is:

MENTOR NAME: _____ **Department:** _____

If Mentor belongs to a CENTER or INSTITUTE, the Director's signature is needed below:

CO-MENTOR NAME: _____ **Department:** _____

As needed.

Center / Institute Director Signature _____

MENTOR PID/Fund _____ **Expiration Date** _____

MENTOR PID/Fund _____ **Expiration Date** _____

****MENTOR SIGNATURE:** _____ **DATE:** _____

The faculty member's signature certifies that they have the research resources and funds to support the work of the student for a minimum of two years needed for the student to earn his/her degree.

Sarah Lindauer, Associate Dir, Finance & Administrator: _____

Signature approval of the CSB COGS Chair and Department Chair is required. The Supervising Professor/Mentor is responsible for financial support for all of the student's research activities.

SIGNATURES REQUIRED:

COGS Chair:	Date
CSA Chair:	Date

SCHEDULING FOR FINAL ORAL EXAMINATIONS AND BINDING OF DISSERTATIONS AND THESES

There are certain procedures that must be followed for a student to complete in any given semester. The following is a suggested schedule for completion of the dissertation or thesis:

Step 1. Submit to the Supervising Professor and Supervising Committee a final draft of the Dissertation or Thesis. Allow 3 weeks for review and comments.

Step 2. Submit to the Graduate Office a final draft of the Dissertation or Thesis. Allow three weeks for review and comments.

Step 3. Submit to the Graduate Dean's Office 15 days before the scheduled date of the final oral.

* Request for Final Oral Examination

A room should be reserved by the mentor with Room Scheduling (x2655).

*20 copies of the abstract and Vita stapled together

Note: Allow sufficient time between the Final Oral Examination and the Graduate Faculty Council meeting, at which the completion of degree requirements and Final Oral Report will be presented, to complete any changes or corrections to the Dissertation or Thesis that required by the Supervising Committee or Committee on Graduate Studies.

Step 4. Submit to the Graduate Dean's Office **5 days** prior to the Graduate Faculty Council meeting at which the degree completion will be reported.

*Report on Oral signed by all members of the Supervising Committee and Chair of COGS.

*Approval Page of Dissertation/Thesis signed by Supervising Committee and COGS Chair.

*A copy of the FINAL version of the Dissertation or Thesis

The outcome of the final oral examination and fulfillment of degree requirements must be reported to and approved by the Graduate Faculty Council at its monthly meeting prior to the end of the semester. The Graduate Faculty Council meets on the second Friday of each month.

Prior to leaving this institution, the items listed below must be completed. This is in order to assure that records are complete and the Dissertation or Thesis can be bound as required by this institution and in accordance with the student's wishes.

- * Binding instructions. These are conveyed in person to the Graduate Dean's Office. At this time a fee slip or memo is issued to pay for the binding of the Thesis or for the binding and Microfilming of the Dissertation. Payment is made at the Student Loan desk in the Accounting Office. If the department pays for the binding of any copies, an account number will be needed.
- * Copyright Disclaimer Form
- * List of Colleges/Universities Attended
- * Administrative Clearance (All students must complete this form)
- * Microfilm Agreement Form (Doctoral candidates only)
- * Survey of Earned Doctorates (Doctoral candidates only)

A student may appoint a representative to attend to the details of payment and pickup of the bound copies.

APPROVAL FORM FOR THESIS PROPOSAL

This form must be signed by all local members of your Thesis Committee.

The member of the committee who is located outside of the Health Science Center need not sign below, but he/she should be sent a copy of the proposal once it is approved by COGS.

We, the members of the Thesis Committee of _____, have seen, read, and approved her/his Thesis Proposal. We agree that it is ready for presentation to the Committee on Graduate Studies of the Cell Systems & Anatomy Program.

Rev. 8/2013

Dear _____:
(Student's name)

I am writing on behalf of the University of Texas Health Science Center at San Antonio (UTHSCSA) to ask your written permission to distribute the following digital work(s) online:

Title of Dissertation/Thesis:

Once the work has been digitized, it will be placed in the UTHSCSA Library's Repository (<http://learningobjects.library.uthscsa.edu/>) to share with others for educational and research purposes only. Full acknowledgement will be given to the rights holder for a given work when the digital reproduction is accessed.

Please select one of the following to indicate with whom you want to share your work(s):

General public

UTHSCSA faculty, staff and students only

The copyright holder(s) retain(s) all rights to the work(s) that are distributed online but if you would like a particular rights statement to be retained in the description of the work(s), please provide that statement here:

If you do not provide a rights statement, we will use the following:

"The digital reproductions on this site, held by the Library at the University of Texas Health Science Center at San Antonio (UTHSCSA), including its satellite libraries are provided to the students, faculty and staff of the UTHSCSA and others who visit this site for research, teaching and learning only. Further distribution and/or any commercial use of the works from this site is strictly forbidden without the permission of the copyright holder."

We specifically request permission for the use of your copyrighted work(s) to:

1. Make extra copies of your works for preservation and backup purposes.
2. Display your work on the Web. (We will make your work available to the general public or restrict it to UTHSCSA faculty, staff and students only as you indicated to us.)
3. Distribute single copies of the work for educational and research purposes. If someone cannot use the online version of your work for some reason, we want to be able to print it out for them or provide it to them in a way that they can use. (Example: A person with mobility issues may not be able to use the online copy and want our staff to print it.)

4. Index or encode the work(s) so that they can be retrieved by a search engine. When we put your work into the repository, we will provide a description of the work so that the software we use and web search engines such as Google can index it and people can easily find it. (Note: If you have asked us to restrict your work to UTHSCSA only, it will not be available to web search engines.)
5. Use all or portions of the digital reproductions of the work(s) for website design related to the work(s). (When we put your work in the repository, we may want to display thumbnail images of the work or highlight it in some way within our web site.)

By signing, you are indicating that you have the authority to grant the rights contained in this agreement. You also represent that your contribution does not, to the best of your knowledge, infringe upon anyone's copyright. If the contribution contains material for which you do not hold copyright, you represent that you have obtained the unrestricted permission of the copyright owner to grant the Library the rights in this agreement and that such third party owned material is clearly identified and acknowledged within the text or content of the contribution.

We greatly appreciate your contribution. Please fill in the information below, sign, and deliver to the Graduate Dean's Office or fax to 210-567-3719.

Sincerely,

Luke Rosenberger, MLIS
Director of Knowledge Management
Briscoe Library

I grant permission for the work(s) referenced in this letter to be used in the manner described. I am the sole owner/creator of the work or I have the authority to grant the permission requested herein.

Supervisor:
Last Day on Payroll:

During your last days with Cell Systems & Anatomy, there are several things you need to take care of in order to ensure your separation is processed correctly and your final check(s) are not delayed. The Office of Human Resources has developed a website that provides information related to your separation from the UTHSCSA. I strongly urge you to dedicate a few moments to review it: <http://www.uthscsa.edu/hr/separation.asp>

1. If you are employed on a visa, complete the attached OIS Departure/Clearance form and return to Stephanie Radassao no later than _____.
CLEARANCE SIGNATURE (Radassao): _____ **Date:** _____
2. If you are a **PhD graduate student** or **Master student**, coordinate your student clearance with your coordinator before clearing with the Department (#5 below).
CLEARANCE SIGNATURE (Academic Coord): _____ **Date:** _____
3. Update your personal information. Verify that your home address, e-mail address and phone numbers are up to date by logging into [Employee Self-Service](#) or by sending an email to hr-admin@uthscsa.edu. It is important we have your correct address on file to ensure you receive any post-employment documents.
COMPLETION SIGNATURE (Employee): _____ **Date:** _____
4. If you are a TRS participant and wish to cash out or rollover your funds, complete the Notice of Final Deposit and Request for Refund Form (TRS6) located under the separation procedures at:
http://uthscsa.edu/hr/separation_employee.asp
5. On your last working day, return the following items to your supervisor:
 - a. Uniforms / Scrubs / Lab Coats
 - b. Lab-specific equipment / books/ supplies (including desk or locker keys)**CLEARANCE SIGNATURE (PI/Faculty):** _____ **Date:** _____

Employees return the following items directly to Stephanie Radassao:

- a. Final time sheet
- b. Laptop/Computer/iPad/Mobile Devices
Asset#
Asset#
Asset #
- c. Pro Card
- d. ID Badge
- e. Parking Permit
- f. UTPD Issued Keys (Stephanie Radassao will have a list on your last day)
Note: If you have a fine to pay, are missing your parking permit, or have lost a key, you will need to visit UTPD prior to meeting with Stephanie. Bring your UTPD receipt with you to Stephanie's office. The Department will only clear employees with all UTPD issues resolved prior to their final working day.

Students return ID badge, parking permit and any keys to UTPD after obtaining departmental signatures.

FINAL DEPARTMENT CLEARANCE:

SIGNATURE (Employee/Student): _____ Date: _____

SIGNATURE (Radassao): _____ Date: _____

UTHSCSA CSA MS Program Compact Between Graduate Students and Their Supervising Professors

CSA MS training entails both formal education in advanced scientific knowledge and theory as well as research training under the supervision of one or more investigators who are qualified to fulfill the responsibilities of a mentor. A positive mentoring relationship between the student and the supervising professor is a vital component of the student's preparation for a successful biomedical career.

Individuals who pursue a biomedical graduate degree are expected to take responsibility for their own scientific and professional development. Faculty who advise students are expected to fulfill the responsibilities of a mentor, including the provision of scientific training, guidance, instruction in the responsible conduct of research and research ethics.

This compact offers a set of guiding principles intended to promote and support the development of a positive mentoring relationship between the student and his/her supervising professor(s). This compact also includes the individualized **Milestone Agreement Form**. As mandated by the U.T. System, the individualized Milestone Agreement Form should be in an electronic form consistent with Family Educational Rights and Privacy Act (FERPA) and provided by the program for the purpose of informing students about the milestones that they are expected to reach to earn a MS degree.

Within 4 weeks of formally selecting a supervising professor, students should have discussed with their mentor each of the topics listed on pages 2 – 4 and submitted the form to the COGS chair. To tailor an individualized compact best suited for each student and mentor, specific commitments by both the student and the mentor, detailed processes, additions and specifications should either be added in the space below each topic or in an addendum as deemed appropriate.

With their signature, both the mentor and the students confirm that all topics listed have been discussed and they are committed to uphold the principles agreed upon in this individualized compact. Once approved by COGS, the compact will be placed in the student's file held in the department's office.

It is understood that various aspects of the student's pursuit of their degree can change over time and therefore the compact should be reviewed regularly (at least once a year) and modified as needed. The Milestone Agreement Form is to be updated annually.

DEFINING STUDENT AND MENTOR RESPONSIBILITIES AND EXPECTATIONS

Frequency and Methods of Communication between Mentor and Student (How often will student and mentor meet? How should updates or changes in expectations and issues be communicated?)

Research/Training Related and Professional Development of the Student (What is the student's project? Is there a specific person that will oversee training other than the PI and to what degree will the student assist with other projects in the lab? What constitutes professional development?)

Common Laboratory Responsibilities (Which tasks and duties are shared among all lab members, including the student?)

Notebooks and Data (What is the policy of the laboratory related to the storage of data and laboratory notebooks?)

Work Hours/Attendance in the Laboratory (How many hours per week is the student expected to work in the laboratory?)

Thesis Proposal (How will the mentor and student work together to ensure a reasonable proposal is prepared for COGS? How will the mentor help the student prepare for the presentation to COGS? What are the student's responsibilities in preparing the thesis proposal and presentation of the proposal to COGS?)

Authorship Policies (What is the policy that constitutes authorship in the lab? How is the order of authors determined in a manuscript or abstract?)

Manuscripts expected for Graduation (Are there specific expectations for the number of manuscripts (published, submitted and/or in preparation), and the student's authorship position (e.g. first) on these manuscripts, required for the student to graduate?)

Intellectual Policy Issues: Disclosure, Patent Rights and Publishing Research Discoveries
(What is the policy for patents that come out of the student's work?)

Selection of a Thesis/Dissertation Committee (What is the process for determining the subject of the thesis and the composition of the thesis committee?)

Attendance of Professional and Scientific Meetings (Under which conditions can a student travel to a Regional, National, or International scientific meeting? For example, only if the student or student's work is presented? Who covers the cost and what will be covered?)

Career and Professional Development / Job Search and Placement / Individualized Career Development Plan (What is the career choice of the student and what arrangements can be made to allow the student to participate in courses, workshops, etc. for their particular interests without compromising their research training?)

Time off for Illness or University Holidays – Vacation Policy (HOP 4.3.5; 4.7.14) (What is the laboratory policy for vacations, holidays, and personal days?)

Conflict Resolution and Student Complaint Policies (refer to [Student Catalogues](#); [GSBS website](#))

Additional Topics

We have discussed all the above topics and made the mutually agreed upon additions, specifications and changes. We acknowledge our joint intention to re-evaluate the compact, the agreed upon milestones and the degree completion date at least once a year throughout the student’s period of academic standing.

Student’s Name

Signature of Student Date

Supervising Professor’s Name

Signature of Supervising Professor Date

This compact has been adapted from the [UT System Health Institutions Compact Between Graduate Students and Their Research Advisors](#) and the [AAMC’s Compact Between Biomedical Graduate Students and Their Research Advisors](#) (December 2008).

Milestones Agreement Form

Cell Systems & Anatomy Graduate Program (MS Degree)

This form is provided for the purpose of informing students about the academic milestones that they will be expected to reach in order to earn a Master degree in CSA graduate program. Students are expected to reach each milestone within the specified time period in order to make satisfactory progress through the program. Students who are not making satisfactory progress may be placed on academic probation, or be dismissed from the program.

Academic Advising

The Cell Systems & Anatomy Graduate Program has two tracks (Anatomical Sciences and Biotechnology) in its Master's degree program. Each of these tracks has a student advisor appointed by the program director. Upon selection of a mentor, each student is asked to schedule an initial meeting with his/her mentor/supervising professor and the appropriate track student advisor, and the mentor will inform the student with the rules and review the degree requirements with the student. Thereafter, the student will be required to meet every 6 months to discuss study plans and progress towards milestones with his/her mentor and track student advisor. These meetings will be initiated by the student.

Academic advising, to be facilitated **jointly by the supervising professor/mentor and the track student advisor**, includes the following elements that are designed to ensure that students remain in good academic standing and make satisfactory progress through the program. However, the student is responsible for ensuring that he/she meets the requirement for the master degree.

- The supervising professor/mentor will ensure that the student assembles the supervising committee before the beginning of second year.
- The student will ensure that semi-annual meetings will occur with his/her supervising committee and that the committee members complete the evaluation forms which become part of the student's record. The results of these meetings will be filed with program coordinator.
- Guidance on course selection to be provided by the supervising professor/mentor and the track advisor, as appropriate, and is documented as a memo filed with the student advisor. (Program requires course selection to be entered by the student.)
- Review of the student's Degree Plan to determine if he/she is making progress consistent with the expectations of the program and reaching milestones according to the timeline provided on this form, to be done by the supervising professor/mentor and track advisor, working with the supervising committee, COGS and the student to determine if modifications are necessary.
- Clarification of the timetable for completing any remaining course requirements, examinations, and other program requirements to be done by the respective track advisor.

- In collaboration with supervising committee, the supervising professor/mentor and the track advisor will provide the student with assistance in understanding the requirements for successful completion of thesis research.
- Experiences and information that will optimize the student's career opportunities and success to be provided by the supervising professor/mentor.

**Milestones for all MS students in the Cell Systems & Anatomy
Graduate Program**

<u>Milestones</u>	<u>Expected Time of Achievement</u>
Review of program requirements by COGS Chair	Incoming Student Orientation and the first class of "Introduction to Research", Fall Semester of Year 1
Mentor Selection and completion of mentor selection form	December 15 of Year 1
Review of degree (and track-specific) requirements and academic plan of study by track advisor and mentor	During or before the third week of Jan of Year 1
Inclusion of student on mentor's research protocols (e.g. IACUC) and/or IRB approvals (if applicable)	Before Jan 15 of Year 1, before any research activities begin;
Selection of members of a thesis supervising Committee & start writing thesis proposal.	Before August 1 of Year 2.
Have the thesis committee meeting, and get the proposal approved by the committee.	Before October 1 of Year 2.
Thesis proposal prepared and presented to COGS for approval, and approval of the thesis committee by COGS	Before November 1 of Year 2
Application for approval of admission to MS candidacy	No later than end of Fall semester Year 2
Thesis completed, successfully defended, and approved by supervising committee and Graduate Faculty Council (GFC)	No later than May 15 of Year 2
Completion and filing of all paperwork required for graduation	No later than end of Spring semester Year 2
Submission of exit survey to the CSA program and Dean responsible for student affair in the Graduate Dean's Office	No later than end of Spring semester Year 2

Degree Completion Checklist for Students

- Review requirements for MS degree in CSA (including all required coursework) and Milestones and complete *Milestones Agreement Form* with your mentor and assigned advisor. This should occur as soon as mentor/track selection occurs but **no later than end of January of Year 1**
- Maintain active student status by registering for courses every fall and spring semesters except when on an approved leave of absence granted by the GSBS upon a recommendation by COGS
- Complete all required organized coursework, including Supervised Teaching
- Schedule and successfully complete required thesis proposal
- Together with your supervising professor/mentor, form your thesis supervising committee (membership must comply with the CSA MS Degree Program Guidelines)
- Have your thesis supervising committee approved by CSA COGS, and complete GSBS form 42.
- Prepare and successfully present your dissertation proposal to CSA Graduate faculty
- Apply for Advancement to Candidacy, and complete GSBS Form 31.
- Enroll in required thesis hours and complete your thesis research
- Successfully complete defense of your written thesis
- Submit required documentation to the Graduate School for completion and graduation, and complete Form 41.

I, _____, have read this form and have had the opportunity to discuss the information contained in it with my mentor and student advisor. I understand the academic milestones that I am expected to reach in order to successfully complete the Cell Systems & Anatomy program, as well as the expected timelines for completing these milestones.

LEAVE POLICY FOR CSA GRADUATE STUDENTS

The following has been added to the Graduate Program Guidelines in Cell Systems & Anatomy, effective August 5, 2005.

“Students are expected to be present and fulfilling curricular requirements throughout their tenure in graduate school. Any absence must be approved by the supervising professor. Requests must be submitted at least one month in advance except in the case of dire emergency.”
